## Access Control – Session Registration

---

1. Go to [Swiftium.co](https://www.swiftium.co).
2. Log in to enter your Exhibitor Portal.
3. Select the show in question using the *Select a Show* dropdown.
4. Click on *Manage Show Configuration*.

5. Hover over *Registration Data* and click on *Third Party API*.

6. Using the *Select Third Party Api* dropdown, select *eTouches - Session Access Control*.
7. Enter you *API Key* and *Account ID*, then click *Get Events*.
8. Using the *Select Event* dropdown select the event in question. Then click *Next*.
9. You have the option to overwrite the SetupFile Sessions or use the current SetupFile Sessions. When you have made your choice, click *Next*.
10. Check off which sessions your would like to use using the checkboxes along the left side. If you would like everyone to have access to any one session use the *All Granted* checkbox on the right.
11. Click next at the bottom of the page.
12. Match the fields to the correct values using the dropdowns.

Badge ID	<input type="text" value="Registration ID"/>	<a href="#">Additional Field Settings</a>
Access Control	<input type="text" value="Hexadecimal Access Control Token"/>	<a href="#">Additional Field Settings</a>
First Name	<input type="text" value="First Name"/>	<a href="#">Additional Field Settings</a>
Last Name	<input type="text" value="Last Name"/>	<a href="#">Additional Field Settings</a>
Company	<input type="text" value="Company"/>	<a href="#">Additional Field Settings</a>
City	<input type="text" value="Empty Field"/>	<a href="#">Additional Field Settings</a>
State	<input type="text" value="US State"/>	<a href="#">Additional Field Settings</a>
Zip	<input type="text" value="Zip (Postal Code)"/>	<a href="#">Additional Field Settings</a>

13. Click Finish.
